

Andrian-Maksym Balaichuk

Senior C++ Software Engineer

Software Engineer specializing in high-performance backend systems. Proven experience designing scalable architectures, optimizing critical components, and delivering reliable production software with strong background in algorithms, concurrency, and clean code.

WORK EXPERIENCE

Middle/Senior C++ Software Engineer Sygic/Eurowag

07/2025 - Present Bratislava, Slovakia

Sygic/Eurowag is a global navigation software company developing GPS navigation, routing engines, and map-based services.

- Develop and optimize core C++ navigation and routing engine components with focus on correctness, performance, and scalability
- Design and maintain routing-related backend APIs, ensuring reliable production behavior
- Develop map-processing algorithms and data pipelines

Middle C++ Software Developer BSH Drives and Pumps s.r.o.

06/2024 - 07/2025 Slovakia, Kosice

BSH Drives and Pumps s.r.o. is a subsidiary of BSH Bosch und Siemens Hausgeräte GmbH, a leading global manufacturer of home appliances.

- Owned development of critical C++ components aligned with project goals
- Optimized existing code to improve performance and maintainability
- Fixed bugs and troubleshoot assigned modules to ensure system reliability
- Supported junior developers and shared technical knowledge

Junior C++ Software Developer BSH Drives and Pumps s.r.o.

06/2022 - 06/2024 Slovakia, Kosice

BSH Drives and Pumps s.r.o. is a subsidiary of BSH Bosch und Siemens Hausgeräte GmbH, a leading global manufacturer of home appliances.

- Implemented C++ features under mentorship following engineering best practices
- Performed basic bug fixing and module maintenance
- Built strong foundations in C++ and software engineering principles

EDUCATION

Informatics

Slovak University of Technology in Bratislava

08/2025 - 06/2027 Bratislava, Slovakia

Informatics

Technical university of Kosice

08/2022 - 06/2025 Kosice, Slovakia

SKILLS

C/C++

Software development

Jira

Bitbucket

Python

Git

Linux

SQL

Azure

Helm

Kubernetes

Devops

Algorithms

Scrum

MAIN PROGRAMMING SKILLS C++

Advanced C++

- Expert-level modern C++ (C++11/14/17/20/23).
- Advanced template metaprogramming (SFINAE, specialization, C++20/23 Concepts)
- Strong command of memory management, object lifetime, and performance optimization.
- Multi-threaded programming with mutexes, atomics, async workflows.

Algorithms & Data Structures

- Strong knowledge of algorithms and data structures: arrays, vectors, maps, sets, graphs, hash tables.
- Practical experience with sorting, searching, traversal, and complexity analysis.
- Designed optimized solutions for real-world production workloads.

Software Architecture & Design

- Designed modular, maintainable systems using proven design patterns (Factory, Strategy, Observer, Singleton...).
- Advanced OOP: polymorphism, interfaces, static/dynamic dispatch.
- Led code reviews and drove clean-code standards across projects.

Backend Development (C++)

- Designed and implemented RESTful backend services in C++.
- Built APIs handling business logic, data processing, and system integration.
- Implemented multi-threaded services.
- Focused on performance, reliability, and scalable service architecture.

Development Tools & Engineering Practices

- Git (advanced branching and collaborative workflows).
- CMake / Makefile, CI/CD pipelines.
- Unit testing with Google Test.
- Debugging and profiling for production systems.

Libraries & Frameworks

- Extensive STL usage (containers, algorithms, ranges).
- Boost (Filesystem, Asio, Spirit, Date_Time) for networking, parsing, and async I/O.
- Experience building high-performance and concurrent applications.
